

CATEGORY: INDIRECT RESTORATIVES

CEMENT: RMGI

GC FujiCEM™ 2
(GC America)

Why we chose this product:

GC FujiCEM 2 performed well in our labs when bond strength was tested. Long term data is very positive, showing high retention and lack of microleakage.

Consultants' Comments:

- "I am pleased with the esthetics and color stability in the restorations cemented with **GC FujiCEM 2**."
- "The lack of sensitivity is very important."
- "Retention is everything. I was very pleased to see so few debonds with this cement."

ZIRCONIA PRIMER

Z-PRIME™ Plus
(Bisco, Inc.)

Why we chose this product:

Z-PRIME Plus is an excellent zirconia primer which is a single component and does not require refrigeration.

Consultants' Comments:

- "It was really easy to use – single bottle, no mixing – and coated very well."
- "I did not have to refrigerate."
- "Compatible with dual-cured resins and most surfaces."

CEMENT: IMPLANT

CEM-IMPLANT™
(B.J.M. Laboratories, Ltd.)

Why we chose this product:

An excellent non-eugenol resin cement with two-stage cure. It features an initial gel phase for removal of excess cement and a rigid final set in four to five minutes. It is strong, yet allows retrievability for temporary restorations.

Consultants' Comments:

- "Excess cement is easy to remove in one piece and not crumbly."
- "Direct placement of cement into the restoration makes the procedure quick and easy."
- "Perfect consistency and amount of retention."

DENTURE RELINE MATERIAL

Sofreliner Tough S
(Tokuyama Dental America, Inc.)

Why we chose this product:

Sofreliner Tough S adapted well to soft tissue and produced a very good fit. It is easy to dispense and place, and greatly improved comfort for patients.

Consultants' Comments:

- "Great product for denture patients that are healing after a surgery."
- "Holds up well."
- "This product gives the patient pain-free retention."

CATEGORY: POLISHERS

COMPOSITE POLISHER: TWO-STEP

Twist Polishing Kit
(Meisinger USA)

Why we chose this product:

Twist Polishing Kit contains flexible intra-oral composite polishing disks with feathered edging, making polishing easy in any area of the mouth.

Consultants' Comments:

- "The polished surface is noticeably smooth and shiny, with a high gloss and no scratches."
- "Easy to get into grooves for a flawless polish."
- "They held together and could be used multiple times."

CERAMIC POLISHERS

ALL CERAMIC Polishers®
(Cosmedent, Inc.)

Why we chose this product:

Offering both intra-oral and extra-oral kits, these ceramic polishers offer excellent gloss on all types of ceramics.

Consultants' Comments:

- "I like that there is one polishing kit for all ceramic types."
- "Polishers seem to hold up and don't disintegrate during use."
- "Excellent results for IPS e.max and zirconia - very gentle on restorations."
