

### SIGNIFICANT CHANGES COMING NEXT MONTH!

Clinical Research Associates (CRA) was initiated in 1976 by Drs. Gordon J. and Rella P. Christensen. It has served the dental profession with 372 monthly publications, and hundreds of *Dentistry Update*® courses. CRA Foundation remains the only non-profit, private dental product evaluating group working with all types of products dedicated to serving practitioners throughout the world.

Dr. Rella Christensen served as CRA's Director and the major leader for 27 years, donating her time to CRA free of charge. She pioneered the concept of working with large groups of practicing dentists coordinated in extensive long-term research projects. These projects will continue under her direction. A new Clinical CEO will be appointed soon. Dr. Gordon Christensen will continue to serve as Senior Consultant. Gordon and Rella will continue to present at all *Dentistry Update*® courses.

In January 2008, the CRA Foundation Newsletter® will be renamed *Gordon J. Christensen Clinicians Report* in honor of our founder's vision for the future needs of dentistry. You will see changes in style, format, and color in all ten languages presently circulated in more than 90 countries. The foundation's name will be simplified to CR Foundation (Clinicians Report) to reflect the vision of many clinicians

reporting objectively and independently of dental companies for the benefit dental patients worldwide.

A team of dentist Project Directors will coordinate each evaluation with in-house scientific staff, and a team of hundreds of carefully selected, known, trusted practitioners will serve as "Cyber Evaluators." These Evaluators will work in conjunction with the current team of 400 in-office Evaluators around the world. Coordination with all retailers will augment the in-house and field product evaluations to provide broader research and clinical observations for you and your patients. We feel confident you will applaud the changes.

*The need to evaluate all categories of products used by dental practitioners in an unbiased, privately sponsored, non-profit organization is greater than ever before! You can depend on the Clinicians Report, in hard copy or electronic form, to continue to serve you with first look observations, frequent follow-up status reports, and in-depth clinical research.*

We are grateful for and appreciate your continuing support.

## BUYING GUIDE—BEST PRODUCTS OF THE YEAR

This issue features products in several categories which have received highest ratings in CRA's testing during 2007. Categories listed are not comprehensive, but represent areas of active research. Products are identified as follows:

- ★ Valuable "Highly Rated" products from CRA's rigorous, multi-product comparisons.
- 🔍 Most interesting "First Look" products with high "real world" clinical-use evaluations.
- 📖 Helpful "Noteworthy" products from clinical-use evaluations.
- 🏆 Proven "Classics" that were included in CRA testing as controls are identified at the beginning of most sections.

Products evaluated by CRA during 2007 that are not listed may still be in testing, or did not receive an adequately high rating.

Additional company contact information may be accessed free at [www.cranews.org](http://www.cranews.org) (select "Dental List" located in the right-hand margin of CRA's homepage below "Publications").
